

Automated, easy-to-use software for archiving, storing and retrieving NBX IP telephony data

### OVERVIEW

The 3Com® NBX® Multisite Backup Tool is a Windows-based utility that helps ensure compliance with an organization's formal disaster recovery process. It lets administrators schedule and implement automatic and comprehensive archiving of NBX system configuration files based on time, date, days of the week, or days of the month, for one or many NBX systems. Backup files are created at each site and compiled at a central PC server, allowing centralized, graphical reporting that can confirm backup status at each location. An alert function signals a failed backup, and a built-in automatic recovery plan can be implemented in the event of a power failure or PC server crash. Triple redundancy ensures that valuable information is stored on the appropriate hard drive, backup FTP or data center server, or burned to a CD-ROM. And because all system licenses are backed up, 100% of the data is available should a full system restoration be needed.

### BENEFIT HIGHLIGHTS

- Unified NBX NetSet™ portal enables one-click access to each NBX system in an enterprise configuration
- Hot-standby feature can automatically update a second NBX call processor
- Reports list all sites, their connection, backup schedule or hold status
- Full NBX system backup includes voice messages, dial plans, and licenses
- Live reports poll each NBX system for current serial numbers, software versions, features and device capacities.
- Clock synchronization ensures each NBX system clock is accurate

Convenient interface eases scheduling and confirmation of NBX system backups across an enterprise.

### SPECIFICATIONS

#### PLATFORM

Non-dedicated Windows XP, 800 MHz, Pentium III PC

### ORDERING INFORMATION

#### PRODUCT DESCRIPTION

3Com NBX Multisite Backup Tool (Enterprise-wide license enabled with any NBX serial number; includes seven-day trial.)

#### 3COM SKU

3C10476
