

Please Note

For these SFPs to be operational, the Switch 5500 must be running 3Com OS software version V3.2.4 or higher, and the Switch 4500G must be running 3Com OS software version V5.01.02 or higher.

When used with the Switch 5500, this SFP only functions in the last two SFP slots.

Not for use in 100 Mbps SFP-only slots, such as those on the Switch 5500 28-Port FX, 3CR17181-91; use 3Com SFP models 3CSFP81 and 3CSFP82 for those 100M SFP slots
