3Com

3Com® NBX® V3000 PoE Bundle

DATA SHEET

- Complete voice and data solution with Power over Ethernet (PoE) to facilitate converged network implementation

- Easy to order, install, and use with plug-and-play deployment, auto detection for impressively simple moves, adds, changes, and a single cable run for both voice and data

- Built-in productivity-enhancing capabilities including four ports/400 hours AA/VM, CDR, system administration, NBX pcXset™ softphone, ACD, CTI, and personal operator for customizable call handling

Key Benefits

Overview

The 3Com® NBX® PoE Bundle combines in one cost-effective, compact, easily installed platform all of the fundamental telephone features small-to-medium businesses need to help increase productivity and improve customer service.

Bundled capabilities deliver unique value to cost-conscious organizations. Power over Ethernet (PoE) functionality eliminates the need for power cable runs to IP phones. Step-by-step expansion options let businesses control expenditures by matching growth with need—the type and number of IP phones and access points (if wireless connectivity is desired) can be determined over time.

The **3Com NBX V3000 IP Telephony Solution** offers enterprise-class applications—Automatic Call Distribution (ACD), Call Detail Recording (CDR), and voicemail/e-mail intergration—all in a 1U package that includes four analog trunk ports, one station-side port for an analog

phone or fax machine, 400 hours of voice-mail storage, four auto-attendant/voicemail ports, and the award-winning NBX NetSet™ browser-based administration utility. And for practical scalability, the NBX V3000 system can be expanded with the NBX V5000 expansion chassis to support as many as 1,500 devices and a wide array of advanced functionality for network, remote offices, and T1/E1 access.

The web-configurable **3Com Baseline Switch 2226-PWR Plus** automatically detects and prioritizes NBX IP telephony traffic for maximized audio quality. Full 802.3af-compliant Power over Ethernet (PoE) support on all ports lets organizations power 3Com IP phones directly from the switch. This benefit can lower total cost of ownership by eliminating the need to power these devices with additional wiring.

Specifications and further details about the 3Com NBX V3000 PoE Bundle are available in the 3Com online product catalog at **www.3com.com**.

ORDERING INFORMATION

3Com NBX V3000 PoE Bundle	3CV3000PWR

Note: The NBX V3000 PoE Bundle does not include 3Com IP phones, which are available for purchase separately. All 3000 series 3Com IP telephones are compatible with the NBX V3000 PoE Bundle.
