AVAYA

Avaya™ IP Office Telephone Series

## Efficient, Effective Access to Your Communication Tools

Converged Voice and
Data Networks

Customer Relationship
Management

Unified Communication

Supported by:
Avaya Labs and Services

Avaya IP Office offers superior communications functionality and flexibility for small and midsize businesses. None of these advantages, however, are of value to your customers or your business unless you can use them intuitively.

Avaya telephones can help to maximize value from your Avaya IP Office investment. Exclusively designed to deliver the benefits of IP Office to small and midsize businesses, Avaya telephones provide options for both general business use and unique applications. Whether you need a familiar office phone, a user-friendly display telephone, or advanced IP telephones, Avaya IP Office-compatible telephones let you

tailor the system to your specific needs. Features ranging from soft-key functionality to menu-driven operation and built-in displays help employees perform business functions and customer services easily and efficiently. In addition, Internet-enabled functionality and sensible upgrade paths help companies with growing needs.

The versatile Avaya IP Office communication platform also supports many telephones originally purchased for other Avaya communication systems—giving businesses the opportunity to leverage prior purchases and user experience for even greater returns. With the right telephone, you can put the full functionality and flexibility of Avaya IP Office to work for your business.

Avaya 4400 Series Display Telephones

Avaya 4400 telephones offer clear voice quality, advanced digital interfaces, and a range of programmable feature keys for high-speed, high-quality communication in the home or the office.

Avaya™ 4406D+ Display Telephone

With advanced display and keypad functionality, it's ideal for general office applications.
